

Want Safe, Great-Tasting, Alkaline Water?

Here is why our NSF Certified cartridge-based Alkalizer with **SAFEWATER TECHNOLOGY™** beats the competition hands down!

Innovative, cartridge-based design

This state-of-the-art **LIVINGWATERS™ALKALIZER** preserves all the healthy alkaline minerals naturally present in water supplies while removing unhealthy contaminants at least as well as the best RO systems. It turns water into a healthy anti-oxidant by improving its redox potential better than expensive water ionizers that cost from 4 to 10 times as much. Best of all it requires no electricity or high water pressure to operate and maintenance is as simple as an annual cartridge change.

Chloramine Removal

This **LIVINGWATERS™ALKALIZER** can effectively treat CHLORAMINE – a disinfectant made of CHLORINE + AMMONIA now used in municipal water treatment systems in place of chlorine alone. Chloramine goes right through typical filter systems including RO and distillers to become concentrated in product water. Chloramine can be very irritating to the gastrointestinal system and can build up in the tissues of those who drink it with unknown health effects.

Guaranteed Microbiological Protection

Our patented **SAFEWATER TECHNOLOGY™** is independently tested to provide a guaranteed 8-log (99.999999%) removal of cysts, bacteria, molds and spores and a four log (99.99%) removal of virus. Most importantly, it doesn't require power or high water pressure to work so you can depend on it during emergencies, when you need it the most!

Premium Quality "Euro" Top-Mount Faucet

Our premium "Euro" faucet is very high quality compared to those provided with most filter systems. Its extra long reach makes filling pots with water easy. Tubing is pre-attached and the faucet mounts from the top making installation simple as can be. Of course, it is certified lead free!

Easy Installation & Maintenance

One piece design fitted with premium "push-in" style John Guest fittings and top-mount "Euro" faucet with pre-attached tubing makes installation simple. Cartridge replacements are easy and quick.
